VERSATILE SORTER CAE-11

For a wide range of products such as Cantaloupe, Galia and yellow Melon, Cucumber, Zucchini, Peppers, Celery, Eggplant, etc.

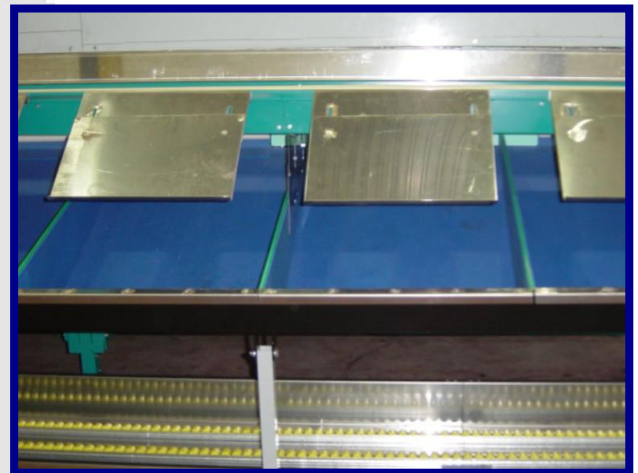

The product is delivered to the Sorter via a positioning table, which can be of aluminum rollers or brushes, depending on the type of product.

The reception of product is carried in padded benches to avoid damaging the product.

Packaging and subsequent evacuation of boxes is done on an easel stand, located on the bench or at the bottom, depending on the installation, once drawn up the boxes, these comes through one conveyor collector of filled boxes, which gathers all containers to palletizing area.

The feeding of the empty boxes is through a "mini rails" without Motorization, located at the top or bottom of the seats, as appropriate.

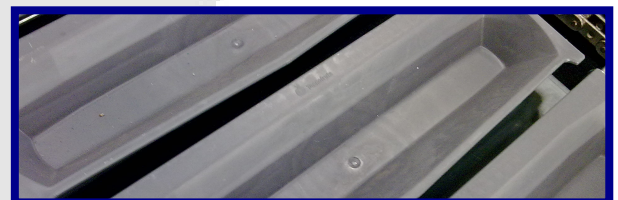

Entrance by aluminum rollers or natural hair brushes.

TECNOFRUTA study in detail all projects, customizing for any specific client installation. We give you the best solution for your business and the latest technology.

For many products.
