TRICOLOR PEPPER SIZER

ELECTRONIC SORTER & WEIGHING MACHINE FOR TRICOLOR.

The sorting & weighing equipment of TECNOFRUTA for "Tricolor" allows a new way of working peppers, to perform both operations together. A number of innovations allow that with a smaller investment can earn higher returns. This equipment has a cost lower than other similar equipments for performing the weighing and packaging in Tricolor, and it has the advantage of including the sorting system. Also takes up much less space, reduces staff and the product is better treated. The result is a pepper processing facility designed to flow-pack that works automatically.

The synchronization of the discharge of the weighing machine with the "flow pack" saves staff at the point of transfer to the infeed conveyor of the filling machine and saving a lot of plastic in the "flow pack" as they fail to produce empty containers.

This equipment has an output for peppers weighing less or greater than the one the "flow pack" is packing. When the size of the peppers is small, the red is repeated (RRGY, rather than the standard RGY, red / green / yellow, of higher quality). This equipment allows to choose for which side is carried out the RRGY discharge (RRGY, rather than the standard RGY).

TECNOFRUTA study in detail all projects, customizing for any specific client installation. we give you the best solution for your business and the latest technology.

For many products.
